AABU
Bachelor's of IT degree in Computer information system . Al-Albayt university 2018-2021.

Professional Experience

2024/04 – present
Amman, Jordan

Software Development (React js)

Jordan ahli bank

- Currently working on an **Admin Portal** for managing customer accounts of the **Qawn application**, a digital product of **Ahli Bank Jordan**.
- Develop and maintain a secure **web-based administration platform** used to manage all Qawn users and their financial activities.
- Implement frontend features based on **Figma UI/UX designs**, translating design specifications into functional and responsive interfaces according to assigned tickets and required features.
- Integrate multiple **backend APIs** to handle critical operations such as:
 - User registration and onboarding
 - Account creation and verification
 - Customer profile management
- Monitoring and managing **transactions and account activities**
- Ensure the portal supports **full lifecycle management** of customer accounts, including account status, user actions, and transaction history.
- Collaborate closely with backend developers, QA teams, and product owners to deliver features aligned with banking requirements and security standards

2023/07 – 2023/12
Amman, Jordan

Frontend Developer - React & Next.js

Roya media group

- Developed **Roya Waves** (royawaves.com) a comprehensive platform for podcasts, live radio streaming, and studio voice recordings.
- Built the frontend using **React and Next.js**, creating a dynamic, interactive, and user-friendly interface.
- Integrated multiple APIs for features such as user registration, login/authentication, profile management, audio uploads, podcast management, and live radio streaming.
- Designed the platform to be fully responsive, ensuring optimal performance and layout across desktop, tablet, and mobile devices.

- Implemented real-time audio playback and interactive elements for podcast and radio content.
- Developed user management system, including account creation, authentication, and personalized dashboards.
- Optimized frontend performance for fast loading times and smooth navigation across all devices.
- Collaborated with backend services and APIs to ensure seamless data fetching, audio streaming, and content updates.

2021/10 – 2023/07
Amman, Jordan

FrontEnd developer (React JS)

bebsa6a for bussiness

Developed a responsive website that is optimized for both desktop and mobile devices.

Implemented a single-page application using React and Redux that improved overall performance and usability

Utilized HTMLX, CSSX, and JavaScript to create a dynamic, interactive user interface that improved user experience

Integrated third-party APIs to provide additional functionality and improve user experience

Developed unit tests to ensure code integrity and reduce the number of bugs found in production
